

Twenty-First Annual Meeting for Health Sciences Research Trainees
Queen's University
Wednesday, June 13th, 2018
BioSciences Atrium and School of Medicine, Room 132A

Call for Abstracts

The *Twenty-First Annual Meeting for Health Sciences Research Trainees* is set for Wednesday, June 13th, 2018 in the BioSciences atrium and oral presentations in School of Medicine, room 132A. This all-day meeting has been organized in order to provide a forum for graduate students, postdoctoral fellows, research project students, medical students, and clinical residents of the Faculty of Health Sciences and related Schools/Faculties at Queen's University to discuss their recent research findings. Individuals interested in presenting should submit their abstract(s) according to the instructions outlined in the attached form. All presentations will be made by trainees only. There will be a limited number of oral presentations. There will be no limit on the number of poster presentation submissions.

Abstract Submission:

Abstracts must be submitted via e-mail to [Kat Brennan-Rowcliffe](mailto:kat.brennan@queensu.ca) as an attachment in **MS Word format**, including a title, list of authors (underline the presenting author), department where the work was carried out, and supporting agency (where appropriate) at the end of the abstract. Maximum abstract length: **225 words** (plus title and author list (presenting author underlined)).

Deadline for Receipt of Abstracts: Friday, May 11th, 2018

Types of Presentation:

1. Oral: Each talk will be ten minutes in duration plus two minutes for discussion.
2. Poster: 4' x 5' poster boards will be provided at the site. There will be ample time allotted for poster viewing and discussion in the morning and afternoon.

Awards: To be announced.

Cost: There will be a few major sponsors for this event. To partially cover the cost of lunch and two coffee breaks, we ask the supervisor to provide \$40.00 for each attendee (i.e PI + # of students).

Research Themes:

- | | |
|---|--|
| 1. Biomedical Engineering | 7. Patient Care and Nursing Research |
| 2. Cancer Research and Therapy | 8. Protein Structure and Function |
| 3. Cardiac, Circulatory, and Respiratory Sciences | 9. Rehabilitation Science |
| 4. Health Policy, Population Health, and Epidemiology | 10. Reproductive and Sexual Function |
| 5. Inflammation, Infection and Immunity | 11. Therapeutics and Toxicology |
| 6. Neuroscience Research | 12. Women's and Children's Health Research |

The above list of research themes is designed to help the Scientific Review Committee to group presentations and is not exhaustive. New themes will be added when there are enough abstracts submitted in a particular area of research.
