

Twenty-Fourth Annual Meeting for Health Sciences Research Trainees

Queen's University

Tuesday, June 28, 2022

Queen's School of Medicine - The Britton Smith Foundation Lecture Theatre (132A)

and Biosciences Complex - Atrium

Call for Abstracts

The *Twenty-Fourth Annual Meeting for Health Sciences Research Trainees* is set for Tuesday, June 28, 2022 at Queen's School of Medicine and Biosciences Complex. This all-day meeting has been organized in order to provide a forum for graduate students, postdoctoral fellows, research project students, medical students, and clinical residents of the Faculty of Health Sciences and related Schools/Faculties at Queen's University to discuss their recent research findings. Individuals interested in presenting should submit their abstract(s) according to the instructions outlined in the attached form. All presentations will be made by trainees only. There will be a limited number of oral presentations. There will be no limit on the number of poster presentation submissions.

Abstract Submission:

Abstracts must be submitted via e-mail to [Mary White](#) as an attachment in **MS Word format**, including a title, list of authors (underline the presenting author), department where the work was carried out, and supporting agency (where appropriate) at the end of the abstract. Maximum abstract length: **225 words** (plus title and author list (presenting author underlined)).

Deadline for Receipt of Abstracts: Friday, June 3, 2022

Types of Presentation:

1. Oral: Each talk will be ten minutes in duration plus two minutes for discussion.
2. Poster: 4' x 5' poster boards will be provided at the site. There will be ample time allotted for poster viewing and discussion in the morning and afternoon.

Awards: To be announced.

Cost: There will be a some major sponsors for this event. **There will be no charge to supervisors this year.**

Research Themes:

- | | |
|---|--|
| 1. Biomedical Engineering | 7. Patient Care and Nursing Research |
| 2. Cancer Research and Therapy | 8. Protein Structure and Function |
| 3. Cardiac, Circulatory, and Respiratory Sciences | 9. Rehabilitation Science |
| 4. Health Policy, Population Health, and Epidemiology | 10. Reproductive and Sexual Function |
| 5. Inflammation, Infection and Immunity | 11. Therapeutics and Toxicology |
| 6. Neuroscience Research | 12. Women's and Children's Health Research |

The above list of research themes is designed to help the Scientific Review Committee to group presentations and is not exhaustive. New themes will be added when there are enough abstracts submitted in a particular area of research.
